NEWLINE SHELVING

Open and Closed Type Shelving

Open Type Shelving

The most basic and economical shelving design for general purpose use is the open type shelving. The open backs and sides are stabilized by sway braces. Units included 2 box posts, 2 angle posts, 2 sets of side sway braces, 1 set of back sway braces, shelves and hardware.

7 Shelf

8 Shelf

Closed Type Shelving

Closed type shelving units improve stability and provide protection to stored items because they are covered on three sides with steel panels. Units contain 2 box posts, 2 angle posts, 2 side panels, 1 back panel, shelves, and hardware.
